

Distributors

Rapidly changing technology and consumer preferences make wholesaling a risky business. Our experience in financial analysis and systems review can help you manage that risk. We are prepared to offer administrative, operational, and special project assistance in the following areas:

Purchasing, Receiving, and Inventory Procedures

Improve procedures to ensure accountability and to minimize the risk of inventory loss.

Operations Audit

Assess procedures and practices through the entire distribution process and assist in developing and implementing improvements where needed.

Financial Management

Develop procedures and benchmarks that signal warnings on inventory levels and provide more appropriate information on product profitability and pricing, and for decisions on product promotion or termination.

LIFO Inventory

Assist in valuing LIFO inventories and in analyzing financial reports on income tax effects of LIFO inventory decisions.

Uniform Inventory Capitalization

Assist distributors in determining costs that must be included (capitalized) in the value of ending inventories, in compliance with IRS regulations.

Accounting, Attestation, and Compliance Services

- Audit, review and compilation of financial statements
- Litigation and expert witness support for business disputes and lawsuits
- Federal, state and local tax returns
