Renewable Fuels

Industry Focus

Current fuel prices and the dependence on government support are critical issues that continue to influence the renewable fuels industry. As crude oil prices continue to rise, demand for biofuel will energy use. In order to survive biofuels manufacturers and distributors must prevail over these and other challenges with ground-breaking solutions to make biofuels an affordable and smart alternative to regular gas and diesel.

We understand your big picture and can offer you strategic business advice to help you get there in today's complex business environment and turbulent economy. For more than 15 years, Boulay has served 50 private and public renewable energy clients representing approximately 2 billion gallons of potential capacity nationwide. Manufacturing and distribution embodies approximately 200 clients for our firm with more than 20 professionals dedicated to serving the renewable fuels industry. Providing products and services from development stage, initial public offerings to fully operational, we help you reach your business goals.

Proactive Communication

Successful business relationships are based on proactive, consistent communication. As your business advisor we communicate early and often to provide you strategic advice on the changing reporting and compliance requirements that can impact your business. We'll alert you to changes through Boulay publications designed to communicate reporting and compliance changes and work directly with you to help you understand the impact to your business.
